

# Sample Patch & Vulnerability Readiness Responses

This sample response file demonstrates how an SME might complete the **Vulnerability Management Questionnaire** and the **Patch Management Readiness Checklist**.

It provides realistic scoring and can be used to test the readiness scoring engine.

---

## Scoring Format

Each question is scored as:

- **0 = Not implemented**
  - **1 = Partially implemented**
  - **2 = Mostly implemented**
  - **3 = Fully implemented**
-

## □ Interpretation

These sample responses reflect a **moderately mature** vulnerability & patch management posture.

### Strengths

- Patch cycles exist and run consistently
- Inventory management mostly reliable
- Cloud workloads partially monitored
- Reasonable patch compliance rates

### Weaknesses

- Limited testing before deployment
- Weak emergency patching capability
- Weak tracking of repeated failures
- Lack of full vulnerability triage
- Minimal threat intelligence usage

### Expected Score Range

A submission like this will score approximately **80–95**, which fits the “**Moderate Readiness**” maturity level.

---

## □ How to Use This File

You can use this sample to:

- Test the scoring engine

- Populate dashboards
- Provide examples during audits
- Train staff on how to complete the questionnaire
- Demonstrate toolkit usage in documentation
